modified fastch by treating starth with a variant of a mallocogenic
margines. The masked is and to produce high or low salice speciality sympton
sympton or speciality parupa, useful as of. In balking and hearing, Also
used to have starth for the sim contribusing space and in food produce be
leverages, beweage flowour concentrates and flowouring specials, as a
fix multiture and to she mattors for use e.g. in farrowing agencial, as a
outsiding or as intermediate for the sevenance statistic.

The SED coding sequences, wetcher and their colls are useful for the Production of SEDs in a high yield. Extracellinis production of the SEDs makes their use in a Might production of the SEDs makes their use in a capable of expressing a SED without protechytic degradation of the expressing a SED without protechytic degradation of the expressing as SED without protechytic degradation of the composition of the superseast protection or any problems normally associated with translocation of proteins in Recibility Describes.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 1702 ACAGOGACTGTGAAATCCTGGACATCCAATCGGATTGAAGTGTACGTTCCCCAACATGGCC

— Comman used in the method of the invention to prepare an oral cure composition. The production useful for oral cure prevention. The production useful for oral cure prevention for companies, four prevents of central plaque, as a tocolopaste, four product control could conduct, monthly weak, prevent or coor product conduct, monthly weak, prevent or conduction, the white green, locations, or candy.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               O; Gabs
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 An oxal care composition comprises a single unit Starch Binding
Domain - useful for improving oxal hygiene and preventing the
formation and/or for removing dental plaque
